PG – 301

III Semester M.C.A. Examination, April/May 2022
(CBCS – Y2K20 Scheme)
COMPUTER SCIENCE
3MCA : Cloud Computing (Elective)

Time : 3 Hours Max. Marks : 70

Instructions : *Answer **any five** questions from Section – **A** and **any four** questions from Section – **B**.*

SECTION – A

Answer **any five** questions. **Each** carries **6** marks. **(5×6=30)**

1. Define cloud computing. Enlist and explain the essential characteristics of cloud computing.
2. Give a brief account of cloud service models.
3. What is virtualization ? Discuss about Hypervisor Software Management.
4. Differentiate between cloud computing and distributed computing.
5. Discuss the advantages and disadvantages of PaaS.
6. Discuss the security in public and private clouds.
7. What is parallel programming ? Compare distributed programming with parallel programming.
8. Explain the information security in cloud computing.

SECTION – B

Answer **any four** questions. **Each** carries **ten** marks. **(4×10=40)**

9. Discuss various applications of cloud computing. Explain how cloud computing can be used with respect to social networking.

P.T.O.

10. Explain the cloud reference architecture and discuss the responsibilities of various actors.

11. Define OS virtualization. Discuss the virtual infrastructure requirements.

12. a) What is Google App Engine ? Explain the benefits of Google App Engine. **5**

    b) Define Microsoft Azure. Discuss the components of Microsoft Azure. **5**

13. Define Map-Reduce. Explain Hadoop ecosystem and mention its components.

14. Define cloud security. Discuss access control and authentication in cloud computing.

JP – 774

III Semester M.C.A./M.Sc. (Two Years Course) Examination, May/June 2023
(CBCS – 2021-22)
COMPUTER SCIENCE
MCA 3E4/MSC3E4 : Cloud Computing (Elective)

Time : 3 Hours Max. Marks : 70

***Instructions** : Answer **any five** questions from Section – **A** and answer **any four full** questions from Section – **B**.*

SECTION – A **(5×6=30)**

1. a) What is cloud computing ? State its characteristics. 3
   b) Explain about cloud economics based on the pay as you go model. 3
2. Outline various types of clouds in detail and give suitable examples. 6
3. Describe the working of software as a service and identify Saas challenges. 6
4. Discuss the advantages and disadvantages of cloud infrastructure services. 6
5. Explain the following terms : 6
   i) Distributed computing.
   ii) Utility computing.
   iii) Grid computing.
6. Give a detailed account of platform as a service. 6
7. Describe map reduce programming paradigm for data processing applications. 6
8. Explain access control and authentication in cloud computing with an example. 6

P.T.O.

SECTION – B (4×10=40)

9. Illustrate the cloud computing framework reference architecture and discuss responsibilities of various actors. 10

10. a) Discuss cloud application development lifecycle. 4

    b) Explain in detail virtual machines and VM migration services. 6

11. Justify the need for integration services in cloud computing with an example. 10

12. Illustrate the architecture and working of Aneka cloud software development environment. 10

13. Describe in detail the following : 10

    i) Google App Engine.

    ii) Amazon Web Services.

14. Explain the following : (2×5=10)

    i) Infrastructure and network level security.

    ii) Host level and application level security.

PG – 377

III Semester M.C.A. (Two Years Course) Examination, May 2024
(CBCS) (2021 – 22)
COMPUTER SCIENCE
MCA3E4/MSC3E4 : Cloud Computing (Elective)

Time : 3 Hours Max. Marks : 70

***Instructions** : 1) Answer **any 5** from Section – **A**.*

*2) Answer **any 4** from Section – **B**.*

SECTION – A

Answer **any five** of the following. **Each** question carries **six** marks. **(5×6=30)**

1. Explain the characteristics of Cloud Computing.
2. Define Cloud Computing. Explain the merits and demerits of using Cloud Computing.
3. Explain different types of streaming protocols used in multimedia cloud computing.
4. Examine the role of cloud computing in task management.
5. Explain the following terms :
   a) Cluster Computing
   b) Utility Computing.
6. Differentiate between Hardware Virtualization and Server Virtualization.
7. Discuss the merits of IaaS Computing Model.
8. Give a detailed account of platform as a service.

P.T.O.

SECTION – B

Answer **any four** of the following. **Each** question carries **ten** marks. **(4×10=40)**

9. Explain the properties, characteristics exhibited by cloud computing.

10. Discuss map-Reduce.

11. Explain the types of cloud service development.

12. Describe the following :

    Open stack and Cloudsim.

13. Explain the data privacy and security issues and access control authentication in Cloud Computing.

14. Explain the cloud security tools and technologies with details.

III Semester M.C.A. (Two Years Course) Examination, May/June 2025
(CBCS) (2021 – 22)
COMPUTER SCIENCE
MCA 3E4/MSC 3E4 : Cloud Computing (Elective)

Time : 3 Hours Max. Marks : 70

Instruction : *Answer* ***any five*** *questions in Section – **A** and* ***any four*** *in Section – **B**.*

SECTION – A

Answer **any five** of the following. **Each** question carries **six** marks. **(5×6=30)**

1. What are the core qualities of cloud computing ?
2. Explain various types of cloud service models.
3. Define SaaS integration. Explain the benefits of SaaS integration.
4. What is virtualization ? Discuss the types of VM migration services.
5. How is cloud computing different from distributed computing ?
6. Describe the cloud computing PaaS model.
7. What is Map Reduce ? Explain the logical data flow of map reduce function.
8. Explain the security threats and legal issues related to cloud computing.

DSCASC - LIBRARY

SECTION – B

Answer **any four** of the following. **Each** question carries **10** marks. **(4×10=40)**

9. Discuss the cloud reference architecture and explain the responsibilities of various actors.
10. Explain the cloud application development life cycle.
11. What is grid computing ? Explain the working of grid computing.
12. Explain Hadoop ecosystem and mention its components.
13. a) What is Google App Engine ? Explain the advantages of Google App Engine. 5
    b) Discuss Amazon web services. 5
14. Discuss cloud security, its access controls and authentication in cloud computing.

PG – 676

III Semester M.C.A. (Two Years Course) Degree Examination, May/June 2026
(CBCS) (2021 – 22)
COMPUTER SCIENCE
MCA3E4 : Cloud Computing (Elective)

Time : 3 Hours | Max. Marks : 70

Instructions *: Answer should be written in* ***English*** *only.*

PART – A

Answer **any five** questions. **Each** question carries **six** marks. **(5×6=30)**

1. Define cloud computing. Explain the major challenges in Cloud Computing.
2. Explain how organizations leverage cloud computing for business benefits.
3. Describe the role of SaaS Integration Services in cloud computing.
4. Discuss various cloud platform services provided by PaaS.
5. Explain its role in integrating private and public clouds.
6. Briefly explain the components of the Apache Hadoop library.
7. Compare security features of private cloud and public cloud.
8. Describe the legal aspects of cloud computing.

PART – B

Answer **any four** questions. **Each** question carries **ten** marks. **(4×10=40)**

9. Explain the cloud (IaaS, PaaS, SaaS) service models in detail with a diagram.
10. Describe the Cloud Application Development Lifecycle in detail.
11. a) Describe cloud sim and Aneka in detail. **5**
    b) Explain Amazon Aws in detail. **5**
12. Explain the evolution of computing paradigms leading to platform as a service (PaaS), including Distributed Computing, Grid Computing, Utility Computing and Cloud computing.
13. Compare and analyze parallel and distributed programming models.
14. Elaborate on Access Control and Authentication in cloud computing.
