PG – 402

III Semester M.C.A. Examination, April/May 2022
(CBCS – Y2K20 Scheme)
COMPUTER SCIENCE
Web Programming (Elective)

Time : 3 Hours | Max. Marks : 70

Instruction : *Answer **any five** questions from Section – **A** and answer **any four** questions from Section – **B**.*

SECTION – A

Answer **any five** of the following, **each** carries **6** marks. **(5×6=30)**

1. Differentiate between HTML, HTML5 elements and its attributes. **6**
2. Define local storage, session storage with suitable examples. **6**
3. Define Document Object Model (DOM) and list out various events present in it. **6**
4. Explain in detail about MIME. **6**
5. What is AJAX ? Explain the structure of Request-Response mechanism in AJAX ? **6**
6. Write a short note on prototype inheritance in AJAX. **6**
7. List out various key and form related events in Document Object Model (DOM). **6**
8. Write a short note on Cross-Domain Access in AJAX. **6**

SECTION – B

Answer **any four** of the following, **each** question carries **10** marks. **(4×10=40)**

9. What is Javascript ? Explain the role of arrays, functions with suitable examples. **10**
10. Explain in detail about Document Object Model (DOM) event propagation. **10**
11. Explain database access mechanism in AJAX with suitable example. **10**
12. Explain in detail about RSS in AJAX with suitable examples. **10**
13. What is XML ? Explain the role of parsers with example. **10**
14. Explain the similarities and differences between JSON and XML. **10**

Bangalore

JP – 775

III Semester M.C.A./M.Sc. (Two Years Course) Examination, May/June 2023
(CBCS – 2021 – 22)
COMPUTER SCIENCE
MCA3E5/MSC3E5 : Web Programming (Elective)

Time : 3 Hours Max. Marks : 70

Instruction : *Answer **any five** questions from Section – **A** and **any four** questions from Section – **B**.*

SECTION – A

Answer **any five** questions. **Each** carries **six** marks. **(5×6=30)**

1. List any five new tags of HTML5 and explain them.
2. Explain Array as object in JavaScript and illustrate any four array methods.
3. Define DOM. Give a tree representation of window object.
4. Explain Event Propagation and ways of event propagation.
5. Difference between GET and POST in HTTP methods.
6. Define MIME. Explain types of MIME in detail.
7. Explain onreadystatechange event in XHR object.
8. What are XML parser ? Explain any one parser.

SECTION – B

Answer **any four** questions. **Each** carries **ten** marks. **(4×10=40)**

9. a) Explain new features of HTML5 in compare to HTML. **5**
   b) What is Local storage and how is it useful ? **5**
10. a) What is event handler ? Explain AddEventListener ( ) to register event handlers. **5**
    b) How do we access elements in JavaScript using methods ? **5**

P.T.O.

11. a) Define Apache web server. Write features of Apache web server. **5**

    b) Explain http configuration files use in web server. **5**

12. a) What is XMLHttpRequest ? What are the properties of XmlHttpRequest ? **7**

    b) What is the role of callback() in AJAX ? **3**

13. Explain the basics of AJAX. Describe the Request Phase, Response Phase, Receive Phase. **10**

14. Explain the following : **(2½×4=10)**

    1) Apache Virtual Host

    2) JSON

    3) CORS

    4) RSS Feeds.

PG – 378

III Semester M.C.A. (Two Years Course) Examination, May 2024
(CBCS) (2021 – 22)
COMPUTER SCIENCE
MCA3E5/MSC3E5 : Web Programming (Elective)

Time : 3 Hours Max. Marks : 70

Instruction *: Answer* ***any five*** *from Section –* ***A*** *and* ***any four*** *from Section –* ***B****.*

SECTION – A

Answer **any five** of the following. **Each** question carries **six** marks. **(5×6=30)**

1. Define Hoisting in JavaScript. Explain Variable and Function Hoisting. **6**
2. Explain how functions can be written in JavaScript. **6**
3. Discuss the various string handling methods in JavaScript. **6**
4. Bring out the difference between Object and Object References in Javascript. **6**
5. Create a web page to illustrate the flow of courses and subjects in a college website. **6**
6. Identify the best features in JSON and XML. **6**
7. Discuss the difference between GET and POST methods in AJAX Request. **6**
8. Define Event delegation. Explain the dispatching of custom events. **6**

SECTION – B

Answer **any four** of the following. **Each** question carries **10** marks. **(4×10=40)**

9. What is AJAX ? Explain about XMLHttp Request Object in detail. **10**
10. Explain the database connectivity and database access in AJAX. **10**
11. What is the .htaccess file ? Explain its usage and implementation in Apache Server. **10**
12. Explain the Request and Response formats of HTTP. List a few of them with status code and phrases. **10**
13. Write JavaScript to find the sum of the first 'n' even number and display the result. Get the value of n from the user. **10**
14. Explain Javascript DOM selectors in detail with an example program. **10**

PG – 674

III Semester M.C.A. (Two Years Course) Examination, May/June 2025
(CBCS Scheme) (2021-22)
COMPUTER SCIENCE
MCA3E5/MSC3E5 : Web Programming (Elective)

Time : 3 Hours | Max. Marks : 70

Instructions : *1) Answer **any five** questions from Section – **A**.*
*2) Answer **any four** questions from Section – **B**.*

SECTION – A

Answer **any five** of the following. **Each** question carries **six** marks. **(5×6=30)**

1. Describe different types of Web Socket Event.
2. List out briefly different window object properties.
3. Differentiate between JSON and XML.
4. Define MIME and its types.
5. Discuss briefly XMLHTTPRequest methods.
6. Write seven changes from HTML to HTML5.
7. Differentiate between RSS and atom feeds.
8. Explain the working principles of cookie.

DSCASC - LIBRARY

SECTION – B

Answer **any four** of the following. **Each** question carries **ten** marks. **(4×10=40)**

9. a) What is local storage ? And how is it useful ? **5**
   b) Explain the methods of Javascript Arrays. **5**
10. Define DOM. Explain the Tree representation of DOM. **10**
11. Define Apache Web Server and write its features with an example. **10**

P.T.O.

12. a) Explain the phases of AJAX technology. 5

    b) Describe any five string methods with an example for each. 5

13. a) Explain XML document in the form of tree structure with diagrammatic representation. 5

    b) Explain briefly XML parser. 5

14. Write short notes on :

    a) On ready state change event. 4

    b) Virtual host. 3

    c) CORS. 3

III Semester M.Sc. Examination, May 2024
(CBCS) (2022 – 2023 Onwards)
COMPUTER SCIENCE
MSC304 : Web Programming

Time : 3 Hours Max. Marks : 70

***Instruction** : Answer **any five** questions from Part – **A** and **any four** questions from Part – **B**.*

PART – A

I. Answer **any five** of the following. **Each** question carries **six** marks. **(5×6=30)**

1) Explain with a neat diagram the relation between the web servers, web clients/users and their communication in the context of Internet/World Wide Web.
2) Describe a tag in HTML5 using an example. What is the minimum number of tags required to create a web-page in HTML5 ?
3) Explain the different types of cascading style sheets with code.
4) What are servelets ? Explain the life-cycle of servelet and its methods.
5) Using a program as an example, discuss a cookie.
6) Define Javascript. Explain the DOM model with respect to Javascript.
7) What is PHP ? Explain any 2 operations on files using PHP.
8) Write short notes on **any 2** of the following :
   a) Database access with PERL
   b) Ruby Rails
   c) Ajax. **(3+3)**

PART – B

II. Answer **any four** questions. **Each** question carries **ten** marks. **(4×10=40)**

9) Explain about Hash variables. Write a PERL program to count character frequency in a string using Hash variables.
10) Define CGI. Explain in detail, using suitable examples, the ways to pass data to CGI-Scripts.

P.T.O.

11) Discuss the steps involved in connecting to database and access it with PERL and MySQL.

12) Explain :

a) Cookies creation and handling in PHP.

b) Control statements in RUBY with an example. **(5+5)**

13) Write a PHP program to generate 3 random between 1 and 20. Display the message that sum of 3 numbers is greater than,

less than, or

equal to

15

In addition, also display whether

the sum is even or

the sum is odd

14) Write short notes on **any 2** of the following :

a) Architecture of database access.

b) Model view controller in RUBY.

c) Form Handling in PHP.
